

# Aaron Jones

Frontend Engineer with 10+ years of experience designing and building web applications that prioritize user experience and product needs. I excel in lean, fast-paced teams where frontend decisions are tightly aligned with user needs and rapid iteration is key. From greenfield builds to complex system migrations, I bring a hands-on approach to crafting intuitive interfaces, collaborating deeply with product and design, and shipping thoughtful solutions quickly.

## EXPERIENCE

### Ambassador Labs - *Senior Frontend Engineer*

November 2023 – July 2025

- Developed the client application for Blackbird, a greenfield SaaS API development platform focused on specification authoring, mocking, and ephemeral test environments, as part of a 7-person engineering team.
- Designed, architected, and built the client-facing web application from the ground up, delivering a modern and performant interface.
- Collaborated closely with our product team to define and design the product interface. Using mid-fidelity mockups for fast iteration and selectively leveraging Figma for high-fidelity workflows and polished UI.
- Back-tested and iterated on interface design using behavioral and screen-capturing software to ensure an intuitive experience and prioritize features based on user workflows.
- Developed two AI-assisted tools to streamline API workflows: a chatbot for generating OpenAPI specs using the OpenAI Node SDK (later migrated to the Vercel AI SDK), and a codebase analyzer that parsed source files to programmatically generate OpenAPI specifications.
- Established a frontend testing using Playwright for end-to-end test coverage and Jest for targeted unit tests.

### Stoplight.io - *Senior Frontend Engineer*

January 2020 – July 2023

- Contributed to the development of the Stoplight platform, a collaborative SaaS solution for designing and documenting APIs with OpenAPI and JSON Schema.
- Developed the 2nd version of the administration application, building user and project management interfaces and migrating legacy UI to the in-house Mosaic design system.
- Worked closely with backend developers and UX designers to design, develop, and improve our existing interface. Focused heavily on scalability, performance, and general intuitiveness.
- Acted as a core maintainer of the Mosaic component library, building Tailwind-powered, composable UI components and driving adoption of consistent design patterns across teams.
- Introduced a shared component repository and implemented Storybook with Chromatic to standardize UI development, improve frontend resource management, and ensure visual consistency across products.
- Contributed to backend feature work and internal APIs, primarily using Node.js and PostgreSQL, in support of product features and integration needs.

## SKILLS

### Core Technical Skills

- ❖ **React** - 7 years
- ❖ **Typescript** - 5 years
- ❖ **JavaScript** - 10 years
- ❖ **HTML/CSS** - 10 years
- ❖ **Next.js** - 2 years
- ❖ **Webpack** - 5 years
- ❖ **State Management** - 7 yr  
(Jotai, React Query, Mobx, Redux)
- ❖ **Unit Testing** - 5 years  
(Jest, React Testing Lib.)
- ❖ **E2E Testing** - 5 years  
(Playwright, Cypress)

### UI/UX

- ❖ **Figma** - 3 years
- ❖ **Wireframing** - 10 yr  
(Figma, Balsamiq, Mockflow, PS)
- ❖ **Design Systems** - 4 yr  
(Storybook /Chromatic)
- ❖ **Component / CSS Libraries**  
(Material UI, Chakra UI, Tailwind, Bootstrap )

### Backend / Dev ops

- ❖ **Node.js** - 4 years
- ❖ **ASP.NET** - 6 years
- ❖ **Database Tooling**  
(Postgres, GraphQL, Hasura)
- ❖ **Authentication**  
(Auth0, JWT)
- ❖ **Cloud Platforms**  
(GCP, Vercel)
- ❖ **CI/CD**  
(Github Actions, Docker, Circle CI, Jenkins)

## Kibo Commerce (Formerly Mozu E-Commerce) - Senior Frontend Developer

December 2016 – November 2020

- Senior Frontend Developer on Kibo's eCommerce administration platform, a SaaS product using React/Redux, Immutable.js, Webpack, and legacy Ext JS, supported by a .NET microservice architecture.
- Heavily contributed to the migration from Ext JS to React, helping build and maintain both codebases during the transition and delivering production-ready components across both stacks.
- Maintained and extended Kibo's core storefront theme and JavaScript SDK, integrating Backbone.js, ASP.NET, and Django templates to support dynamic retail experiences.
- Supported the growth of a distributed UI platform team, participating in hiring and onboarding efforts and regularly assisting teammates through pairing sessions and daily technical discussions.
- Participated in sprint planning and feature breakdowns, provided feedback during code reviews, and contributed to frontend-focused debugging and issue resolution across integrated .NET services.

## EDUCATION

Texas A&M University  
College Station, TX

**2014 - Bachelor of Science**  
*Technology Management Program*

Texas State Technical  
College  
Waco, TX

**2010 - Associates of Applied Arts and Science**  
*Web Design and Development Program*

## Volusion ( Mozu Enterprise E-Commerce Platform ) - Frontend Developer

October 2015 - December 2016

- Developed standalone web applications as part of the Integrations team, extending platform functionality by interfacing with internal systems and third-party services. Tech stack included AngularJS, React/Redux, ASP.NET MVC, Express.js, and Node.js.

## Texas A&M Engineering Extension Service -Web Communication Specialist

January 2014 – August 2015

- Frontend and SharePoint Developer, responsible for building and maintaining the agency's internal and external SharePoint 2013 sites and a .NET-based class scheduling application.

## Texas A&M Engineering Extension Service - Student Web Developer

August 2010 – January 2014

- Designed and developed user interfaces for internal .NET applications focused on training and personnel management, with an emphasis on UX design using ASP.NET, Razor, HTML, SASS, and basic JavaScript/jQuery.

## Web Developer - Independent

2009 – 2011

- Led end-to-end design and development of 14+ WordPress and static websites for small businesses, as part of a two-person team
